Executive Summary

In 2026, Doctors for Madagascar (DfM) made significant strides in enhancing healthcare access and quality across the regions we serve. Our patient support initiatives successfully managed 1,304 cases, with DfM covering a total of 75,078,639 Ariary, representing 70.9% of the expenses incurred. This effort helped avoid catastrophic expenses for 295 families across 15 healthcare sites. Our commitment to improving health outcomes is reflected in our various programs, including ambulance services, tuberculosis (TB) management, community worker training, and data quality assurance, all of which contributed to a robust healthcare framework in Madagascar.

Financial Access and Patient Support

The Maternal and Child Health Program (MCHP) demonstrated a strong impact in 2026, with DfM supporting 1,304 patient cases. Our financial assistance of 75,078,639 Ariary, which constituted 70.9% of the total costs, played a crucial role in alleviating the financial burden on families. This program successfully prevented catastrophic health expenditures for 295 families, ensuring that essential medical services remain accessible. With operations spanning 15 healthcare sites, the MCHP continues to be a vital component of our mission to improve maternal and child health outcomes in Madagascar.

Ambulance and Emergency Referrals

In 2026, our ambulance service facilitated 142 trips, covering a total distance of 8,829 kilometers. The median response time was recorded at 2.52 hours, demonstrating our commitment to timely medical assistance. Impressively, the cure rate for patients transported by our ambulances reached 85.9%, underscoring the effectiveness of our emergency response efforts. This service is critical in ensuring that patients receive prompt care, particularly in remote areas, and it continues to be a cornerstone of our healthcare delivery system.

- Placenta praevia: 9
- Rupture utérine: 9
- Hémorragie ante- ou post-partum (placenta praevia, HRP, rupture utérine, etc.): 9

Tuberculosis Patient Journey

The tuberculosis (TB) program recorded significant activity in 2026, with 2,267 journey records logged. Out of these, 603 positive cases were identified, leading to 626 treatment starts, reflecting our proactive approach to TB management. The establishment of 5 diagnostic centers has enhanced our capacity to detect and treat TB effectively. These efforts are crucial in combating the TB epidemic in Madagascar, and we remain dedicated to improving screening and treatment access for affected populations.

Community Health Workers

In 2026, our network of community workers expanded to 221 individuals, with 219 actively engaged in health promotion activities, achieving an impressive 99% activity rate. A total of 204 community workers received training, equipping them with the necessary skills to deliver effective health education and services. Additionally, 196 community workers were provided with essential materials to support their outreach efforts. This robust community engagement is vital for fostering health awareness and improving health outcomes at the grassroots level.

Community Mobilization

Throughout 2026, DfM conducted 71 sensitization activities, engaging a total of 2,891 participants. These activities were designed to raise awareness about various health issues and promote healthy practices within communities. As a result of these efforts, we recorded 63 referrals for further medical assistance. The high level of community participation in these sensitization initiatives highlights the importance of education in improving health outcomes and empowering individuals to take charge of their health.

Data Quality and Audit Trail

In 2026, our commitment to data quality was reflected in the collection of 6,685 records with high confidence, 137 with medium confidence, and 15 with low confidence, resulting in an overall data quality rate of 97.8%. This high level of data integrity is essential for informed decision-making and program evaluation. By ensuring accurate and reliable data, we can better assess our impact, allocate resources effectively, and continuously improve our health programs in Madagascar.
